

MARTOL EV 40 CF

Metalworking

Pressing oil evanescent fluid.

UTILISATIONS

- Cutting, pressing, forming.
- This product is particularly suitable for the cutting and forming of aluminium less than 1mm thick and is also suitable for working with copper and copper alloys.

ADVANTAGES

- Excellent spreading of oil film.
- Good wettability.
- Colourless mineral oil.
- Good cooling capacity.
- Odourless.
- Good pressing capacity.
- Because of its low volatility, **MARTOL EV 40 CF** can be applied using any means : sprinkling, spraying, roller.
- Product does not contain chlorine. Leaves very slight residue on parts thus making it possible to eliminate or restrict degreasing.

TYPICAL CHARACTERISTICS	METHODS	UNITS	MARTOL EV 40 CF
Density at 15°C	ISO 3675	kg/m ³	771
Appearance	visual	-	colourless
Viscosity at 20°C	ISO 3104	mm ² /s	2,05
Flash point	ISO 2719	°C	60
Ash content	ISO 3993	% weight	0

Above characteristics are mean values given as an information.
